How 'bout a hand for the Piper

Actually, you don't need a "hand" for Hammond's Piper Autochord. A finger will do. That's right, even if you consider yourself a one finger musician, you can make beautiful music on the amazing Piper.

here's why:

- The Piper has just one keyboard.
- The left hand accompaniment plays automatically with a phantom bass feature.
- The Piper's seven automatic rhythms play individually or in combination.
- The Piper has a dazzling variety of solo and percussive sounds.
- The Piper has no pedals to fuss with.
- The Piper sounds great. It's the easiest keyboard instrument ever.

Stop by and try it. Before long your friends will be giving you a hand.
